

Fortis tracks provenance, provides data assurance and enforces least privileged access via a combination of blockchain and communication agents to enable trusted operations in a Logistics Under Attack (LUA) Framework.

### US Govt Data Attacks

- 26,000 attacks per day (18 / minute)\*
- DoD, intel agencies, nuclear labs & Fortune 500 companies were targets of Russian hackers in 2021
- A zero-trust approach reduces the average cost of a breach by \$1.76m

\*Verizon's 2020 Data Breach Investigations Report (DBIR).

### Fortis Digital Supply Chain Advantages

#### Zero Trust

Across multiple organizations & environments

#### Data Breach Detection

Data-centric Security Model Independent of the trust level of network it operates on

#### Authentication & Authorization Policies

Follow the data through out the supply chain & product life cycle

#### Auditability

Data integrity across systems & environments

#### Digital Twin

Historical record of data pull, or query created

## Air Force Posture Statement FY2022

The Air Force's future force design recognizes the need for change and the range of threats to the Nation, our allies, and partners. In 2021, we identified three key capability development areas for investment: connect the joint force, generate combat power, and conduct logistics under attack.
